

BROTHER ISLAND - DEADALUS- ELPHINSTONE BDE

This liveaboard safari takes divers to some of the Red Sea's most iconic offshore reefs. The adventure begins with the legendary Brother Islands—Small Brother and Big Brother—famed for their dramatic walls, strong currents, and regular sightings of large pelagics including hammerhead sharks and dolphins.

Next, explore Daedalus Reef, a remote marine park with sweeping walls, vibrant corals, and the chance to encounter schools of jacks, barracuda, and grey reef sharks. Its offshore location makes it one of Egypt's most thrilling dive experiences.

The journey concludes at Elphinstone Reef, a must-visit for its sheer drop-offs, abundant soft corals, and frequent sightings of sharks and large pelagics. With challenging drift dives, pristine reef environments, and unforgettable encounters with big fish, the BDE route is perfect for experienced divers seeking adventure and the Red Sea's top offshore sites.
